## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Yano (EP 1253475).

Regarding Applicant's claim 1 – 5, 7-8 and 13 Yano disclosed toner comprising polyhydroxyalkanoate( PHA) having chemical structure ( see claim 3, Formula [1], line 30,page 61) same as claimed by Applicant in formula (1) of Claim 1 ( R1 presented as carboxyl group or salt). Other units claimed by applicant in Claims 1-4 also disclosed by Yano in Claim3- see Formulas [2],[3],[4],[5],[6],[7],[8][9] and [10].

Regarding Applicant's Claim 6 Yano disclosed that PHA has Mn in a range from 1,000 to 10,000,000 (see claim 4, page 64).

Regarding Claims 9 –12 Yano disclosed image forming method with transferring toner step ( see claim 14,page 65) and image forming apparatus ( see claims 15 and 16,page 65).

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1711

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 of Application No.10/532,137 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 7,153,622. Although the conflicting claims are not identical, they are not patentably distinct from each other because claimed subject matter claimed in Claims 1-4 of concerning Application No.10/532,137 significantly overlapping in scope with claimed subject matter of US. Patent No. 7,153,622 (claims 1-17): chemical structures of PHA copolymers claimed in both documents are same with same area of use claimed PHA for toner composition. Note that US Patent No. 7,153,622 claimed the same PHA copolymers as disclosed in EP 1253475 (see rejection above).
